

NVU COVID-19 PRECAUTIONS

Disinfecting Procedure

- QTPlus can be used to disinfect all touch point surfaces.
- Read ALL product label instructions prior to use.
- Check to ensure all necessary Personal Protective Equipment (PPE) is being worn, which could include safety glasses, goggles and chemical resistant gloves.
- Proper application is to spray directly on your paper towel until the paper towel is saturated or spray directly onto surface, ensuring complete coverage. The recommended dwell time necessary to kill the SARS-COV2 virus **3 minutes**, meaning the surface has to remain wet the entire 3 minutes.
- Be sure to keep the bottle at a distance from the eyes and face, avoid breathing in the product.
- Please dispose of all paper towels and gloves in standard waste receptacle provided.
- This product should NOT go down the drain.
- Rinse all surfaces that come in contact with food.

Please place a work ticket for replacement of any materials listed above.
