

Upward Bound Summer 2021 *Re:Bound Summer Academic Boot Camp*

We are so excited that we will get to see all of you in person this summer and that we can offer you a summer session that is as educational, fun, and exciting as always! The Summer Program will take place from June 13th to July 23rd. Students have been assigned to cohorts, based on their age and grade, and will spend two weeks living on campus and participating in college preparatory programming. Cohort based sessions will run on the following schedule:

- **June 13th—June 25th:** *Rising Seniors*
- **June 27th—July 9th:** *Rising Juniors*
- **July 11th—July 23rd:** *Rising Freshman & Sophomores*

That being said, with the COVID-19 pandemic still a prevalent issue, your health and safety are at the forefront of our concerns. To ensure that our Summer Program will be carried out in a manner that is safe, **we will be implementing measures which have been established by the college, state, and federal guidelines for residential summer programs.** While it will change the scope of how our summer program typically operates, this will also ensure that every participant will be safe.

Vaccinated students will not be required to wear masks indoors or outdoors, but we will still ask students to maintain social distancing. Vaccinated students will be allowed to travel off campus for special events, to attend sporting events or practices, and / or participate in community activities.

Unvaccinated students will still be required to wear a mask when inside the classrooms, the residence hall, and as they move through the hallways. Social distancing of at least 6 feet will be required. Unvaccinated students will not be allowed to travel off campus – except weekends - during their two weeks in residence. They will also be required to show a negative COVID test when they arrive on campus the 1st week and the 2nd week. These tests should be scheduled on the Thursday or Friday before they begin the summer program and before they return for week 2. Students who feel unsafe attending an in-person Summer Program or are not comfortable following these regulations will not be required to attend. **This is a college and CDC rule and one that we have to follow until we hear differently.**

Summer Orientation Meetings June 5th—By Cohort!

One more reminder—we expect all of you to be here next Saturday at the times listed below for our Summer Orientation Meeting. As you know, the meeting, happening **June 5th**, will be by cohort and we will give you all the information you need to know about your summer session and details about what we expect of you in your classes, your work-study contracts, and the social part of the program.

Our plan is to meet with each cohort student and one of their parents in ASAC 100. Families will be stationed at their own, individual tables. We will have a quick introduction to the summer residential program, talk about classes, and expectations for the summer, take pictures, and then release all of you for the day. We want to meet you all in person as well as your families. If you have questions or concerns please call Rick or Ryan ASAP!

Rising Seniors will meet at **10:00am—11:30am**

Rising Juniors will meet at **12:00pm—1:00pm**

Rising Freshman and Sophomores will meet **1:30pm—2:30pm**

A Word of Advice: Make the Most of Your Summer!

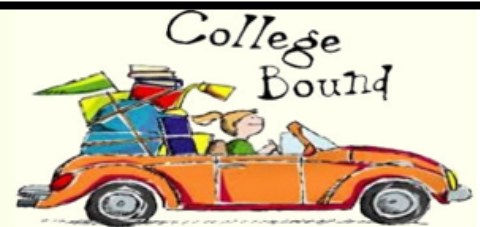

As you know already, this Summer Program is going to be like no other you have experienced! Our goal is to provide you with an engaging, creative, and, hopefully, fun experience that will ultimately assist you on your path to college. We know that you will be better prepared for your next academic year by being with us this summer.

Upward Bound will be a busy, fun-filled, academically challenging, and exciting summer for all of you! The basic outline of summer academic programs will be 4 hours of classes, followed by college counseling courses, and social activities created by the stupendous TC's everyday! You will have the opportunity to grow this summer and hear from outstanding role models, dedicated teachers, and I may even stop by from time to time! And don't forget all of the other great parts of a summer at UB. You can look forward to a new, interesting UB Olympics, exploring careers and colleges, interesting classes with open ended questions, fun electives, SAT preparation, and just getting to be a part of our great program. There are also many more activities to look forward to with your suitemates, TC's, and new friends this summer at UB.

*Make the most of every minute:
it will go by faster than you think!*

GIRAFFE SCHOOL

A quick reminder about the non-academic skills learned in college. Subject study will not always be critical to your future (haven't done much history, myself), **but improving writing, critical discussion skills, and interpersonal skills are major take aways for pretty much any student.**

Ralph Hogan, TRIO Guru

Upward Bound Opportunities

2021 Upward Bound T-Shirt Design Contest

Once again our students are invited to work on and submit their designs for the official 2021 Northern Vermont University Upward Bound Summer T-shirt. But, this year, we will have each cohort design their own shirt. Our students will vote on the design of their choice before the end of their Academic Boot Camp! This will be your summer T-Shirt and we want you to be styling!

All designs must include three things: “Upward Bound,” “Northern Vermont University”, and “2021.” If you are artistic or interested in graphic design this is the project for you!

Good luck! The more designs we all have to choose from the better our T-shirts will be! This year it could be yours!!! Just ask **Joey Sepulveda-Muniz!**

Fourth of July!

Each year the 4th of July affects our summer schedule, both with classes and with our worksites. This summer, we still would like the **juniors** back in the dorm the night of the 4th. If there are fireworks in the Lyndonville area, we may get to see them from campus! Most of the 4th of July events will take place through the early part of the weekend so please plan accordingly. We think that it is always important to have our students with us the entire summer, so please plan any activities around this schedule. Students will be celebrating Independence Day this year with all of their new Upward Bound friends.

Upward Bound Summer Travel

As you know, our Summer travel plans are limited by the rules of the college and the Vermont Governor’s State of Emergency decree. Right now the only students who can travel are the ones who have been vaccinated. We have scheduled a Senior Rafting Trip with Adventure Bound for the weekend following the their Summer Program. We will take about 10 students and three staff members to Caratunk, Maine for this once in a lifetime adventure. At Adventure Bound, there is an outdoor pool, a 10 person Hot Tub, and a climbing wall. Our students have really enjoyed this in the past and we hope to be able to offer it to other students towards the end of the summer.

Additionally, once we are allowed to travel, the Tutor Counselors are looking at potential adventures for all of you for the summer. Here are a few options that we have looked at:

Mount Independence State Historic Site is one of the nation’s most significant Revolutionary War sites, offering six miles of trails along the archaeological remains of the fortification. Jointly owned and managed by the State of Vermont’s Division for Historic Preservation and the Fort Ticonderoga Association, Mount Independence documents the critical efforts to defend northern New York, New England, and the cause of American liberty.

Robert Lincoln built **Hildene** as a summer home at the turn of the 20th century. He was the only child of Abraham and Mary Todd Lincoln to survive to maturity. Robert first visited Manchester as a young man in the summer of 1864 when he came to the Equinox Hotel to meet his mother and his brother Tad. Some forty years later he returned to purchase 392 acres of land to build what he would call his ancestral home. Robert and wife Mary named their Manchester home based on their views of the Taconic Mountains to the west, Green Mountains to the east and the Battenkill flowing through the great valley of Vermont below.

Summer Work Study Stipends

Although we do not expect to have our traditional Work Study component this summer, we are still planning on awarding **EVERY UPWARD BOUND** student a summer work study stipend. This will also include soon to be college freshmen! Our federal grant allows us to award larger summer career stipends if our students do certain things. During most summers it means Jobsites and our Career and College Counseling classes. This summer each cohort will have a list of things to do to ensure that we can meet the requirements for the Work-study stipend. Students who complete the summer work-study component will receive \$200 for each week that they are here.

For most students it will be relatively easy: attend the college counseling seminars, career and college searches, and participate in college and career explorations. Here is an overview of what you should expect:

College Freshmen, your to do list to be eligible for the Work-study Stipend:

- Summer check in with Upward Bound Staff
- Participate in the Upward Bound **College 101 Workshop June 30th**
- Present a **4-year college curriculum plan** for your chosen major
- Submit all **financial aid award letters and your college email, address and first semester class list.**

Seniors

- Will attend **Senior Seminar**,
- Develop their **college admission and scholarship essays**,
- Complete their **FAFSA and VSAC or NHCF forms**,
- And complete a **practice Common Application.**
- Research and present a **4 year college plan for their intended major.**

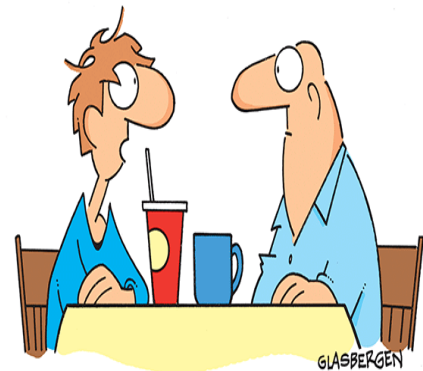

Juniors

- Will develop a **College Matrix**,
- Develop a **college bound resume**,
- **Investigate careers** that will meet their needs,
- And **explore requirements for their prospective career.**

Sophomores and Freshman

- Will complete the **Self Directed search**,
- **Complete and fill out their Upward Bound activities sheet**,
- **Evaluate their transcripts**,
- And **research majors that match their personalities!**

It will be an interesting summer and these activities will help you to become a more focused student with a better understanding of what careers will match your career expectations. We can't wait for Summer!

© Randy Glasbergen / glasbergen.com

GLASBERGEN

"I'll probably spend my whole life following orders from somebody. Instead of college, maybe you should send me to Obedience School."

Upward Bound Scholars.....

Year End Final Exams

If you haven't already started, begin to review for your finals now! In many of our high schools we see our students missing the boat on their finals after a year or half a year of A's and B's. Remember, in some high schools, the finals count as much as a whole marking period. It is not too early, or too late, to talk with your teachers about what you can expect on individual finals you will take. Work hard and work effectively. As your classmates are checking out academically, if you are working to your potential, your teachers will notice and most likely give you the benefit of the doubt!

Be smart and keep those grades up!

Summer Classes 2021 We Need Your Schedules

As our summer program approaches, we are combing through your high school transcripts, talking to your school counselors, and looking to see what classes are the best match for you. Ryan and Kelsea sent out a survey to you a few weeks ago asking about class schedules for next year. We need this from you ASAP to set your summer schedule. You will find that Upward Bound classes will be very different than your high school classes. You will be responsible for learning the information taught to you this summer and the teachers will help you, but they expect that you will work hard to get the most out of these classes.

We have high expectations—nowhere else will you find 100% of your classmates preparing for the rigors of college. We want you to enjoy your classes but we do expect that you will work very hard. Our teachers will challenge you, have fun with you, and may even push you harder than you thought possible, but we know that as the bar rises, you will be surprised by what you learn about yourself. **Get ready to be the best student you can be...**

The Tradition Continues: 17th Annual College 101 and Possible Senior Dinner

As part of the summer contract for our Seniors (soon to be college freshman) we will have a College 101 meeting on **June 30th**! This is an annual tradition that started with the class of 2006. The tradition continues with you: we will share some information and a few stories to help get you ready for college and then hopefully have dinner. The college and the Governor have to approve our plans before we can commit to the dinner part! We will have our Virtual Meeting meet at 5:00 and then hopefully travel to one of Rick's favorite places for a quiet but distinguished meal—yeah right! Please put this date on your calendar and get ready for the next stage of your education!

*Meet Your
Summer 2021
Tutor Counselors*

Dan recently finished up his final year of college. He graduated from the University of Vermont with a degree in Environmental Engineering! Since then, he has gone on to get a job as the STEM teacher at Groveton Middle School. He hopes to eventually be a high school math teacher. Dan enjoys camping, playing games (which he hopes you will all try this summer), and the song Free Bird.

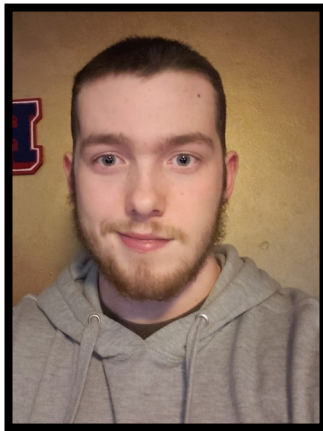

Hi! My name is **Becky Doucet**. I recently graduated from Middlebury College with a degree in Neuroscience. Next year, I head off to Tuft's Medical School where I will continue my Medical School journey. This will be my **5th** summer working for Upward Bound! In high school, I attended Lake Region. I have been a part of the Upward Bound crew since my freshman year! I look forward to getting to spend time with everyone I met last summer, and get to know all the new students who are just joining our UB family!

Hi folks, my name is **Alyssa Leonard** and I'm a recent graduate from the UMF. I earned a degree in Elementary Education with a concentration in middle school science and a Minor in special education. In college, I was an active member of the Dance Team, the aspiring educators group on campus, and MEA. I was recently hired to work at Mill Stream School in Norrigewock Maine and am so excited to begin my career as an educator. I am also apart of the Varsity Track and Field team on campus. Finally, the picture I've included is a photo of me at the Giants Causeway in Northern Ireland! I've been busy but I'm excited for another great UB Summer!

Hi! I'm **Lauren**. I am a recent graduate from Castleton University. I earned a degree in Elementary Education with a Special Education Endorsement. I recently was hired as teacher in Richmond Vermont! In high school, I attended Rivendell Academy and joined Upward Bound to become better prepared for college and my future. This will be my third year as a Tutor Counselor for the Upward Bound Summer Program! I love music and finding fun hiking spots with friends! I can't wait to meet our newest members and reconnect with old friends!

Hi, my name is **Noah**, and I just finished my sophomore year at Boston College. I enjoy being outdoors and playing sports, and I love the academic challenge that comes with being in college. If I'm not in the classroom, I'm on the basketball court. This is my 2nd year as a Tutor Counselor and I am looking forward to working with you all!

*Meet Your
Summer 2021
Tutor Counselors*

Hey Team! My name is **Kelsie**. I recently completed my senior year and graduated from Thomas College. I earned a degree in Secondary Education; Mathematics which has given me the great opportunity to be both a TC for Upward Bound and a math teacher! I will be working with all of you to build up your math skills again this summer! Outside of that I love taking care of my houseplants, yelling at Mr. U, and drinking too much coffee! I am looking forward to meeting and working with all of you!

Communication Devices Policy

NVU-Lyndon Upward Bound recognizes the importance of personal relationships and communication, both in and outside of the community. With that understanding, it is also important to value the community of which one is a part of and opportunities for face-to-face interactions.

We do trust you, and believe that you will do a good job with this policy. Cell phones are an important part of modern day life, but it is important to learn proper cell phone etiquette and be as engaged as possible in the community and opportunities around you. Please be mindful of the fact that you are here at Upward Bound to get to know the other 50 students and staff members on campus, and if we feel that cell phone use is disruptive to Upward Bound we will need to reconsider our policy to allow them.

- * Each student's cell phone and phone number must be registered with the program.
- * Phones should not be visible, and students should not utilize phones during structured program components or while in an actively social environment (see etiquette guidelines).
- * Phones are not allowed in classrooms, at jobsites, or after lights out.
- * Students must be aware of how phone use affects their community involvement.

Registering for College Classes

Many of you will have the opportunity to register for your college classes beginning in June and most of you will have registered before you get on campus in the fall. This usually happens at Student Orientation and the sooner you do this the better. Remember, our advice is to register for classes as soon as possible so you will have a better selection of classes and class times. Be very, very honest with yourself, it is not if you can get up for that 8:00am class, but will you? No one will be around to drag you out of bed—you will be on your own! That is why the 8:00am classes on most college campuses are the last ones to fill up - 10:00 am classes are PRIMETIME.

After you register, please send us a copy of your classes, we have one more surprise for you when you do...

A Word About Our Senior Class and Scholarships

Make no mistake—the senior class of 2021 is a very strong class! This group of students has been actively involved in all aspects of Upward Bound, worked hard to meet their educational goals, and most importantly had an excellent list of colleges. DON'T BELIEVE ME? If you look at the colleges that our students are attending, you need to realize that many of these students received *significant* scholarships and more BIG scholarships will be announced in the next few weeks. Additionally, almost all of our seniors are attending the schools that they should go to, based on their strengths, their financial packages and the schools that best meet their needs. There are a few exceptions...

Although we are happy about the overall class, we are not so pleased with the college award letters. And **Juniors**—every NVU-Lyndon Upward Bound student will be attending their safety or target schools based on our predictions last year! This is real food for thought for all of our students. Our students have put themselves in the best position for success and we are very happy about that!

Again, the thing that did not surprise us was that our **very good students received decent financial aid** based on their families need. Could it be better? Yes, but when we look at the parents' Expected Family Contribution (EFC) and the overall awards, they were consistent.

To the **Upward Bound Class of 2025**—congratulations on your commitment to higher education, to making good decisions regarding college, and to your academic accomplishments.

You Are Not Done with Upward Bound!

Understand that only a small part of our job is complete when you enter college. Upward Bound is about *completing* college and we will be working very closely with you throughout the next 4 years and beyond. Here are a few things that will be happening:

- Letters to your colleges telling them about you and your UB involvement,
- Letters to TRIO SSS programs, hopefully making you eligible for TRIO Scholarships,
- Scholarship money for your grades each year you are in college,
- Letters of recommendation for jobs, Ameri-Corps, VSAC and other Scholarships,
- GRE, MCAT and LSAT waivers for advanced degrees,
- Hiring you as a Tutor/Counselor, Graduate Assistant, or Assistant Director!

Rick's Rules for College Freshman

1. Go to class
2. Get to know your professors
3. Get to know your classmates
4. Explore the campus
5. Get involved
6. Study
7. Think
8. Make good choices
9. Appreciate what your parents and others have done to get you here
10. Enjoy your time at college!
11. Stay in touch with
Upward Bound!

Career Spotlight

Ecology

Ecology is a branch of Biology that deals with the relations of organisms to one another and to their physical surroundings. In essence, it is the study of the relationships between living organisms, including humans, and their physical environment. Ecology considers organisms at the individual, population, community, ecosystem, and biosphere level. Ecology also provides information about the benefits of ecosystems and how we can use Earth's resources in ways that leave the environment healthy for future generations. Ecologists study many types of environments ranging from the microscopic bacteria growing in a fish tank and microbes living under your feet, to animals and plants in the rain forest, and the interactions between thousands of plant, animal, and other communities in the desert. There are many specialties within ecology such as marine, vegetation, and statistical ecology, and they all play a role in providing us with information that helps us better understand the world around us. This information can also help us improve our environment, manage our natural resources, and protect human health. For example: in the 1960s, ecological research identified two of the major causes of poor water quality in lakes and streams-phosphorous and nitrogen-which were found in large amounts in laundry detergents and fertilizers. Provided with this information, citizens were able to take the necessary steps to help restore their communities' lakes and streams-many of which are once again popular for fishing and swimming. Whether you are interested in environmental science, biology, public health, agriculture, forestry, food systems, biomedicine, or even public policy, community development, or education, this might be the major for you!

Possible Careers

Biological Scientist
Environmental Scientist
Epidemiologist
Zoologist
Education Administrator
Agricultural Manager
Farmer
Environmental Consultant
Park Naturalist
Restoration Ecologist
Natural Resources Manager
Field Ecologist
Environmental Policy/Law
K-12 Science Specialist
K-12 Superintendent
Research Technician
Lab Technician
Science Teacher
Ecology Professor
Wildlife Biologist
Plant and Soil Scientist
Environmental Engineer
Forster
Biochemist
Horticulturalist
Geneticist
Pathologist
Naturalist

Where Can I Study Ecology?

Bennington College
College of the Atlantic
Columbia University
Concordia College
Le Moyne College
Molloy College
New York University
Salem State University
Siena College

Sterling College
SUNY Oneota
SUNY Plattsburgh
SUNY Purchase
SUNY Stony Brook
Tufts University
University of Connecticut
U. of Maine at Machias
U. of New Hampshire
University of Rochester
Wheaton College

Considering Ecology as a career? You should be taking Biology, Chemistry, Physical and Environmental Sciences, Climate science, Algebra I + II, Geometry, Statistics, Calculus, Advanced Reading and Writing, Public Speaking, History, Geography, and more.

June Student News

New Students:

Jesselyn Gravel is a rising junior from Craftsbury with many interests....**Charles Crebs** is a rising junior from Craftsbury who loves math....**Alan Moody** is a rising junior from Craftsbury who wants may want to study PT....**Cole Van Winkle** is a rising junior from Craftsbury who is an excellent student...**Adrianna Webster** is a rising junior from LI interested in Marine Biology....**Summer Guilmette** is a rising sophomore from LI who may want to be a vet...**Cote Luciano** is the best students we have from Canaan who is hard working and interested in medicine....**Cady Robillard** is a rising sophomore from LI who may want to become a vet....**Felicity Sulham** is a rising sophomore from BMU who is interested in teaching or nursing....**Kylee Betz** is a rising freshman interested in becoming a teacher....**Skylynn Eckert** is a rising freshman who will attend LI and is exploring options....**Andre Hendrickson** is a rising freshman who is interested in social work....**Marcus Jacob** is a rising freshman who want to know more about business....**Jaelyn Vermeulen** is a rising freshman who is interested in animal science....**Hannah Powers** is a rising freshman and the best Powers ever and is interested in many things!

David Richardson is happy to have made a choice for college and is trying to keep from being overfunded - I wish we all had that problem!...**Kaori Moulton** will speak at graduation!... **Kaylee Hillesland** and **Ray Brooks** say that they should probably be separated as much as possible this summer... **Felicity Sulham** and **Shannon Florentine** agree... for their own sanity! They are all very excited to be Upward Bound's newest recruits from BMU and will represent their school well!... **Natalie Webster** is looking forward to the summer and a white water rafting trip with her family!... **Lily Miller** has a twin brother... **Felicity Perrault** recently got a cactus that she named Chad...**Gemma Stowell** is working on another podcast with a teacher at LI and recently got a succulent... **Chelsea Ott** thinks Ryan needs a watch... **Jarrett Wilkins** enjoyed the 3-for-all college tours... **Eli Hooker** has a goal of making 20 steals before the end of the baseball season ... he is already at 4.... **Kai Aviles** will be riding to prom in style. You might just see them in a horse drawn carriage riding around town!... **Evan Thorn** will show up to prom with an energy drink in his hand. He will be tired from online orientation for college!...**Joey Sepulveda-Muniz** has been hard at work using his artistic talent to create incredible mascot and logo designs for Upward Bound!...**Megan Gifford** celebrated her birthday with friends and family and has begun to consider botany or horticulture as a career path...**Emma Powers** is going to spend her summer working in a job she loves—she is the Camp Activities Director at Sugar Ridge. Oh, and she was excited to hear that her sister **Hannah Powers** will be joining UB...**Will Carter** finally made it to a UB monthly check in! He was excited to share that he is back to work at the Wildflower Inn. They are hiring if anyone wants to join him! **Elly Bliss** and her mom went shopping in the UB attic this month and took home all sorts of good stuff! **Ozora Rice** has been working at the Mooselook Diner and we hear she makes a mean milkshake...**Desiree Mendez** won a hurdle competition in Track and Field! Way to go!...**Vicki Scherer** has been reelected to serve as Class Representative next year... **Nya Jewell** is hoping to become a lifeguard this summer and is looking forward to UB's summer program...**Lauren Girouard** has been busy with Lacrosse and her final exams...**Courtney Lewis** has been waking up at 4 AM every day to attend school from sunny Arizona!...**Miranda Degreenia** has been spending her spare time working at a coffee shop...though she hasn't brought the UB team any free coffee yet...When **Lizzy Duranleau** learned that there were still Bed, Bath and Beyond donations to shop through, she packed up her sister and flew to campus to do some shopping! Don't worry, they didn't take all the good stuff!...**Madi Wilson** was reelected to be Class Representative and was appointed to head a Social Justice Committee next year... **Raymond Lemrise** has been hard at work planning a small scale Color Run and COVID friendly field day with the Student Council... **Thomas Hinton** was asked to serve as a coach for the Middle School Track and Field team this summer—he will do great in that role!... **Colby LaFleur** has been busy playing baseball and seriously considering what he wants to study in college...**Joy Ruggles** has been in Florida, meeting the newest addition to her family...**Aggie LaFleur** has practically started her own business babysitting, petsitting, and house-sitting! She loves it!... **Benjamin Perreault** has been taking college explorations very seriously lately—that's why he dedicated an hour of his time this month to learning more about Champlain College, UVM, and Saint Mike's! Nice work, Ben! **Aliceah Silver** and **Makenna Emmons** got the buzz too and both were happy to join the UMF virtual visit this month...**David Moody** is especially glad that he is graduating and heading off to Boston University in the fall—he recently learned that his brother **Alan Moody** was accepted to join the UB program! **Blake Betz** has deposited at Plymouth and they are looking for him....**Marcy Flint** will soon be a Pirate at UMass Dartmouth....**Natalie Martin** is looking forward to CCV...**Zofia Kosakowski** is getting ready for her Prom....**Madisyn Lamont** is now a Hilltopper....**Devin Daisey** is thinking about his college plans...
